DETAILED ACTION

1. In the 11/5/04 response to the restriction requirement the Applicant elected invention II drawn to an apparatus, and also submitted a new copy of the claims with the restriction response with the apparatus claims withdrawn. It was unclear to the Examiner as to which invention the Applicant was electing, therefore the election restriction is being resent for clarification.

Election/Restrictions

- 2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-11 and 22-34, drawn to a method of making, classified in class 29, subclass 890.14.
- II. Claims 12-21, 35-53, drawn to an apparatus, classified in class 285, subclass 370. The inventions are distinct, each from the other because of the following reasons:
- 3. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case product as claimed can be made by pressing the tube into the outer pipe.
- 4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
